## 1. WELCOME ADDRESS

### Dr Werner Schullink, Executive Director, Iodine Global Network

The South Asia region has achieved success in use of iodized salt with latest data showing that consumption of iodine is adequate among a majority of households in the region. Within this framework, we should congratulate the efforts of the salt industry. Why then do we need this webinar? Because we must not be complacent, sub national inequalities continue to exist. Consumption patterns change and this influences iodine intake. For some countries, backsliding may occur. Setting up monitoring systems becomes important to ensure that the achievements made are sustained.

Some issues addressed through this webinar include the following:

1. How do we set up a monitoring system that ensures continuity of assessing with special attention to vulnerable groups?
2. How do we make sure that iodine intake is put on a stronger foundation through the mandatory use of iodized salt in the preparation of processed food?
3. How do we ensure the adequate iodize intake through iodized salt with the effort to reduce salt intake?
4. How do we ensure a national coordination management structure with sufficient resources exist in countries.
5. The supply and availability of potassium iodate maybe under pressure due to international increases in pricing and difficulties in transportation.

*The progress has been good and achievement remarkable. That progress and those achievements are too valuable to put at risk and therefore we need to continue to promote and sustain adequate iodine intake.*

## 2. OPENING REMARKS

### Ms Vilma Tyler Senior Advisor, UNICEF New York

The global progress toward virtual elimination of iodine deficiency is one of the greatest nutrition success stories of the century. Fewer than 20 countries are at risk, nearly 85 percent of households have access to iodized salt. These great achievements are a result of vision and investment by governments and partners including the private sector. Partners in South Asia have been the Iodine Group Network and other organizations. These investments have had a profound impact on global nutrition for millions of children, adolescents, and women, however these achievements are at risk of being eroded.

Sustained progress requires sustained commitment to ensure that iodine deficiency is eliminated everywhere. Salt iodization has proven that we can accomplish a lot with minimum investment.

The marginal cost of salt iodization is absorbed by consumers, and it is affordable to all. The agenda for the virtual elimination of iodine deficiency is unfinished more than ever; if we are to reach the finish line we need committed leadership, sustained investment and cost-effective innovations. Some countries have specific challenges; targeted support can help remove roadblocks facing them. In some countries that have succeeded there is a risk of backsliding, due to complacency and or sub optimal governance. In both cases we need sustained investment, effective regulations, and vigilant leadership to ensure equitable access to iodized salt and we need to make iodization an industry norm for both households and food industry in every corner of the world.

*UNICEF stands ready to support this unfinished agenda. Large scale food fortification is explicitly included in UNICEF's nutrition strategy as part of our work, and food systems, health systems, education systems and social protection systems.*

### 3. FINDINGS: LANDSCAPE ANALYSIS OF USI & IODINE NUTRITION IN SOUTH ASIA

**Dr Arnold Timmer, Senior Advisor, Iodine Global Network**

The presentation focused on the following points:

- Landscape review of the iodine program status carried out 2020-2021 by the Iodine Global Network (IGN) in partnership with the UNICEF Regional Office of South Asia (ROSA) shows that there have been dramatic improvements in salt iodization and iodine nutrition in South Asia
- There are some inequities across the different countries.
  - In Bhutan, household iodized salt coverage is adequate at the national level, but 6 of the 20 regions have coverage below 90%.
  - In Bangladesh Iodine status is adequate for children (146) and women of reproductive age (123) and national household iodized salt coverage is 76%, but NOT for those that are poor and NOT for those that do use salt without (adequate) iodine - 41 % of households.

- Iodine policies and plans: all 8 countries in South Asia have a policy or plan in which iodine nutrition incorporated, salt reduction strategy exists in all countries except Afghanistan and Pakistan.
- Major challenges in coordination and management are:
  - Insufficiently integrated
  - Unclear mandate and responsibility
  - Lack of consultation meetings
- Most countries (except Maldives) have a mandatory law for salt intake, three countries - Bangladesh, India and Pakistan - are working on national food fortification
- Regulatory enforcement system is a challenge in most countries
- India is the main supplier of salt, some countries are entirely dependent on imported salt (Bhutan, Nepal, Maldives). There are different standards not a barrier for trade of salt.
- Trade of processed food in and outside the region is significant:

## Iodized salt in processed foods & condiments

Trade of processed foods in and outside the region is massive

	Bakery products including biscuits	Dairy products	Savoury snacks	Ready to cook/ convenience foods (e.g. instant noodles)	Condiments, sauces and dressings	Frozen foods	Status of iodized salt use in processed foods and condiments	
							Iodized salt is used	Non-iodized salt is used
Afghanistan				No		No		Yes
Bangladesh		No				No		Yes
Bhutan	No					No		No
India						No		No
Maldives		No	No					Yes
Nepal		No				No		No
Pakistan		No		No				Yes
Sri Lanka			No			No		No

© IMARC, IGN, UNICEF. Review of Regional Trade Standards Pertaining to Processed Foods (in which Iodized Salt is used) and Iodized Salt in South Asia. IMARC, 2020

14

- There is import and export of products with iodized salt. In provinces where household table salt is not iodized; if those populations are using processed food with iodized salt, it can provide them with the iodized salt requirement.
- Most countries in South Asia are in the planning phase. They should focus on food-based guidelines, awareness raising and labelling.
- Opportunities to capture include:
  - Reformulation of foods: integrate reduced salt and iodized salt,
  - Countries do sodium intake surveys (STEP), add iodine status,

- Awareness raising aligned and integrated and Approach NCD colleagues and work together, there is no time to waste!
- WHO has made recommendations on salt reduction and salt iodization
- Awareness of importance of iodine and benefits of iodized salt: Focus is on sustainable awareness raising through education, medical training, and health promotion, intensified focused awareness raising in low-use areas could be useful
- Many countries have outdated information; it is important to update information. National surveys are costly, we need to think of ways to collect information in a faster more sustainable way
- Regional efforts include the following country specific issues and mitigation measures are provided below:

Reduce salt intake to **less than 5 grams per day** (or a teaspoon) and always use **iodized salt**

## Country specific action

Country	Policy, management	Programmatic
<b>Afghanistan</b>	Equity and scaling up is main challenge	Supply non-iodized salt, processed food to fill gaps
<b>Bangladesh</b>	New salt act is opportunity; Equity gaps	Strong supply intervention; processed foods to fill gaps
<b>Bhutan</b>	Sustaining success; few areas with low use iodized salt	All processed food imported; needs strategy; surveillance?
<b>India</b>	Strong program; sub-national focus; sustaining oversight and coordination	Small producers' challenge; new legislation processed foods opportunity
<b>Maldives</b>	Advocate for renewed attention	Program update needed
<b>Nepal</b>	Mainstream iodine management and oversight	Focus on surveillance; revising standards
<b>Pakistan</b>	National fortification legislation?	Focus on low-use areas through processed foods?
<b>Sri Lanka</b>	Sustaining efforts; commitment producers	Surveillance system;

22

- Regional events towards elimination of iodine deficiency include SAARC, IGN and NINSA Network for improved nutrition in South Asia, development partners focus on :
  - Help build political commitment and accountability
  - Advocacy and technical advice to strengthen USI programmes
  - Platform for enhanced coordination, dialogue, south-south networking
  - Monitoring, knowledge and evidence: knowledge generation & sharing
- Recommendations
  - Activate **regional platform** to improve networking capacity through regional engagement, exchange visits with full involvement of national governments

- Establish **support mechanism at regional level** for strengthening the key elements of USI program
- Develop **regional guidance, communication, and knowledge products** to equip country teams
- Undertake **advocacy efforts** for sustained commitments from stakeholders
- Periodic **review and reporting of USI programs** across the region

IGN is a network, a NGO based out of Canada comprised of a virtual team of experts working on these issue. We have regional and national coordinators in each country. This network is well connected to each other and try to support activities. We work on helping countries related to any need they may have through mobilizing network of stakeholders to resolve issues.

#### 4. DEVELOPMENT & ENFORCEMENT OF NEW SALT ACT: BANGLADESH

**Dr Ireen Akhter Chowdhury, Nutrition Officer, UNICEF Bangladesh**

Presentation included the following points:

- Evolution on Salt Iodization Program in Bangladesh: started program in 1989, when first Salt Act was endorsed.
- Evolution of Program Performance in Bangladesh ranges from 1962 to 2020
- 2nd National Micronutrient Survey 2019-2020: showed significant progress.
- Findings from “Bangladesh USI Program review 2016:
  1. Effective and transparent governance: transition of “CIDD project” into sustainable “CIDD program”
  2. Effective co-ordination between various USI stakeholders
  3. Supply of adequately iodised salt:
    - a. improvement in quality of raw salt and setting up Model Salt Farm
    - b. Strict policy for raw salt importation permit
    - c. indigenous production of KIO<sub>3</sub>
    - d. ban on sale of loose industrial salt
  4. Regular and robust outcome assessment: collection of statistical data pertaining to edible salt industry, National level IDD Survey and establish school-based IDD surveillance system.

5. Demand for adequately iodised salt: increase public awareness, create preference for good quality, packaged refined iodised salt and decrease the demand and use for salt sold in bulk which is of inferior quality.
- Major gaps in the salt act of 1989 are:
    - leakage of non-iodized salt as open salt in the iodized salt market with low price
    - the salt used for animal feeds is not covered under the legislation
    - absence of clear demarcation in policy for selling and transportation of industrial salt
    - use of non-iodized salt by the process food industries
    - weak enforcement of existing salt act due to lack of clarity in implementation procedure
  - To safeguard the continued development of the salt industry in Bangladesh, the Government of the People's Republic of Bangladesh, on June 24, 2021, enacted the "Iodized Salt Act 2021" with necessary amendments repealing the Prevention of Iodine Deficiency Diseases Act, 1989.
  - 13 chapters cover several areas including definition of law, guidelines for salt mills, salt research, iodine standards in salt, benefits to cultivators, provision of penalties. Chapter overview is provided below:

- Iodized Salt Act 2021 and it's enforcement: Since 2016 to 2021 till endorsement of Iodized Salt Act, 2021, UNICEF provided technical supports for drafting, consultative workshops, review document, response on feedback from different ministries. It drafted Rules for enforcement of Iodised Salt Act 2021, and they are currently waiting for final review and approval. Government has formed National

Salt Committee as per Act and Established SALT MONITORING CELL as per Act with little deviation.

- UNICEF's support has been given for piloting one salt zone with 40 salt millers. UNICEF supported for development of USI BD Central MIS for Salt Millers. Support included an Evidence-based Data Bank for Salt Millers & USI Program.
- During 2019-2021, the PPP approach documented successful demonstration of harvesting quality crude salt in two fields, implemented by ISMOS and BSCIC (support from UNICEF). The crude salt analysis revealed that significant improvement in quality of crude salt.
- Awareness was created among retailers, consumers, processed food, and animal feed producers with the objective to make aware of the new Salt Act and its repercussions, understand the benefits of iodized salt on the community at large and its people and forecast the future demand for only iodized salt and decreased demand for open/non-iodized salt.
- Iodized Salt Act 2021 Implementation Challenges include:
  - Salt is a political agenda for Bangladesh
  - GOB mostly focus on management of crude salt production and importation
  - No priority for Rules development, in usual process it took longer period 2-3 years (Experienced from Oil fortification act)
  - Although Monitoring Cell established at Corporation level but lack of experienced HR in innovation and decision making
  - Establishing the Public-Private Partnership (PPP) approach is prime requirement for implementation of Salt Act, although it could be quite challenging due to the weak coordination system between the government and the private sector.
  - Lack of involvement and coordination among relevant multiple ministries playing critical roles for salt act implementation
  - Poor coordination among USI stakeholders to support salt act implementation
- Iodized Salt Act 2021 Implementation Opportunities are:
  - Established structure to monitor salt iodization program at sub-national level Local Government Authority experienced to monitor iodized salt in local market
  - Publication of revised National Salt Policy 2022 in line with Iodized Salt Act 2021

## 5. LESSONS. BETTER PRACTICES. CHALLENGES FROM USI PROGRAM: PAKISTAN

### Dr Faiz Rasool, IGN National Coordinator, Pakistan

The presentation highlighted the following points:

- Pakistan has shown significant progress in salt iodization. Salt iodization was initiated in 1980's and Universal Salt Iodization Program is being implemented in 110 salt producing districts of Pakistan and NMDs
- National nutrition survey shows that 80 percent of household coverage has been reached in 2018
- Pakistan is one of the leading countries in South Asia that exports salt
- Achievements of the USI program is illustrated in the figure below:

### ACHIEVEMENTS OF USI PROGRAM\*

#### Technical & Logistics Support

- **Capacity building of Salt Processors** (SPs) in Sindh with financial support of Health Department
- **Hands-on training** on adequate iodization of salt in other provinces.
- **Capacity Building of Food Authority** staff across the country
- **Lab technicians** trained from QCL & RQCL
- **Provision of equipment** to SPs, including Rapid Test Kits (RTKs)-drip feeds, drip sets

#### Support to Govt in Monitoring & Quality Control

- **Continuous monitoring** visits to Salt Processing Units, Markets and household jointly with Health Department /Food Authorities
- **Provision** of reagents and equipment for **QCL & RQCL**

#### Support in Legislation, regulatory mechanism & enforcement.

- **Legislations** passed in Sindh, Gilgit Baltistan & Baluchistan
- **Technical support** provided by NI in the development of Rule of business of Khyber Pakhtunkhwa (KP) Food Authority
- **Salt standards** are part of Food Authorities Regulatory documents in Punjab, Sindh and KP provinces

\*NI Pakistan

- Current strategic challenges include:
  - Improving Iodine Consumption: (80% to 100%)
  - Sustainability: Building Technical Capacity for Monitoring & enforcement and KIO3 Supplies/price/availability
  - Regulatory/Legislative Support: Serious challenge except (GB, Baluchistan and Sindh,)
  - Technical Assistance Pvt. Sector: Technology for small scale SP's
  - Qualitative Testing: RTK's use in HH surveys
- 20-30% of food consumed are processed foods, primarily in urban areas. Most important processed foods and condiments are dairy, baked food and biscuits, savoury snacks, frozen foods and sauces, dressings and condiments

- Improving iodine consumption through processed food could be important opportunity to compensate where salt iodization is weak
- Categories of processed food we need to concentrate on include branded bread, pickles, plain spices, instant noodles, tomato ketchup, frozen meat, salted snacks and crisps, biscuits, butter and margarine, breakfast cereals
- Is indirect consumption of iodized salt even possible in Pakistan? Usage of iodized salt is currently non-existent in most categories. The others have neither considered nor plan to consider using iodized salt in their products and brands.
- Motivations for using iodized salt are that it makes economic sense, it is easily available, and it comes from a standardized product
- Conclusion: Pakistan made remarkable progress: 80% households use iodized salt, adequate iodine status at national level. Problems have been identified; solutions are available. Joint action by all gatekeepers including government, industry and public is required to achieve 100 percent.

## 6. COMMENTARY

### Dr Zivai Murira, Regional Nutrition Advisor, UNICEF ROSA

The success around reducing inefficiency and eliminating deficiency disorders has been an important part of South Asia success story on nutrition of the past two decades. The region has achieved significant reduction in iodine deficiency. This shows what success can be achieved when public policy and business work collaboratively, to address significant public policy challenges bringing together multiple stakeholder platforms with government playing a central role. The political attention which was brought around the need to reduce iodine deficiency starting with the 1990 world summit on children was quite significant. We must protect the gains made in the last two decades, while we address some of the remaining challenges that we address. In addition to political commitment we need to strengthen accountability that comes with these commitments to sustain progress. Looking to moving ahead and how we coordinate our efforts across different sector in the region, sustainability is going to be a key issue, there is a lot of progress within the region, but it is important as we move within the USI agenda, that we plan the future with sustainability in mind.

*Greater attention is needed in terms of strengthening integration of USI strategies, and programs into the various multi sector nutrition plans and budgets.*

## 7. CONCLUDING REMARKS

### Dr Renuka Jayatissa, IGN Regional Coordinator, South Asia

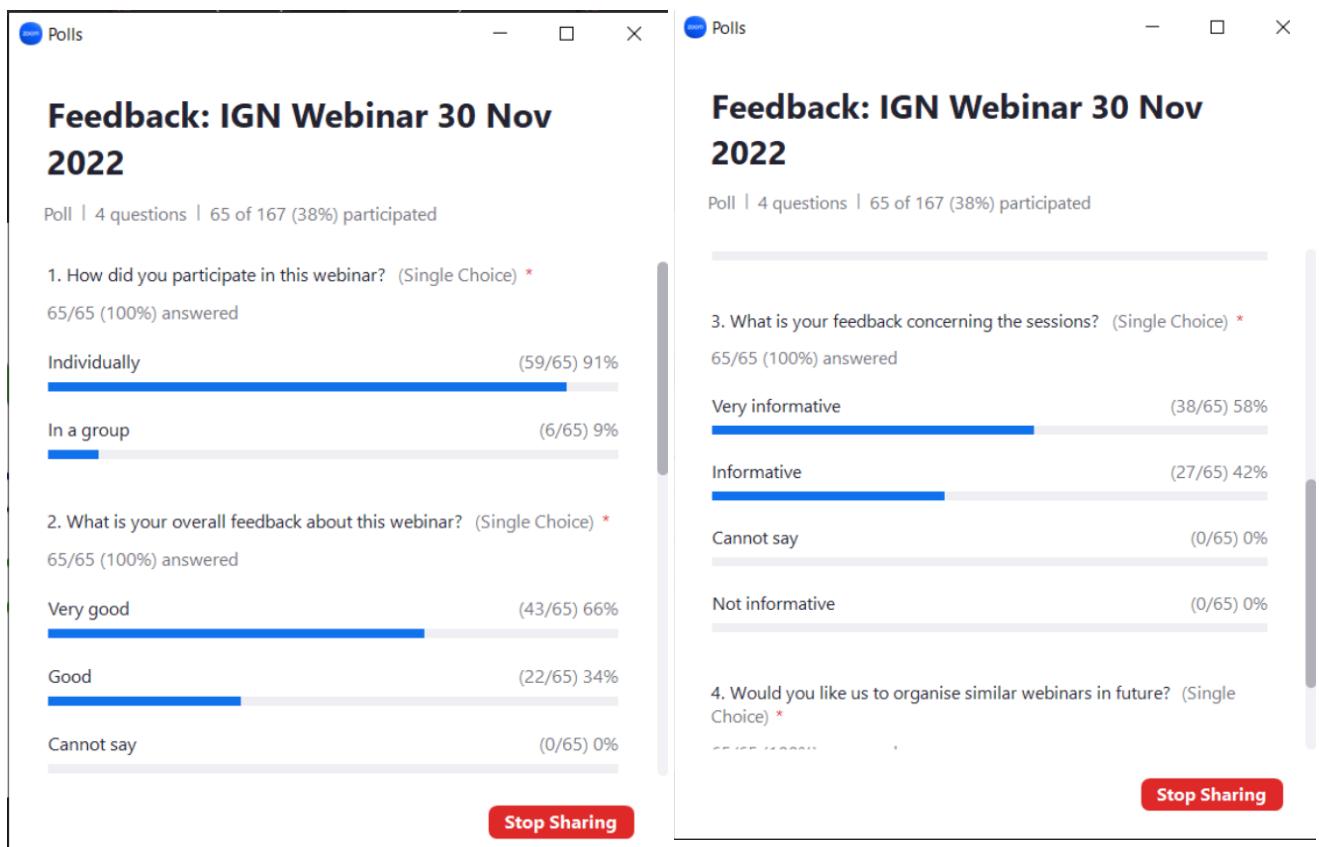

The IGN has provided a learning platform through which we learn a lot, one of the great aspects is the collaboration with UNICEF. UNICEF provides their support to this iodization process. We have made great achievements in the region, now we must focus on sustaining it. Iodine is an essential nutrient; hence sustainability is important. Well done to Bangladesh for coming out with new legislation as has Pakistan, who have done a lot on processed food. There is a need for us to regulate processed food. We are looking at salt reduction as well. These are important and relevant aspects as we must identify gaps and challenges. We are talking of people's good health which is the final objective of our efforts. We must look at other countries and learn from each other and these webinars serve a useful purpose in doing this.

## 8. PRESENTATIONS AND VIDEOS

The webinar presentations and videos are available via Google Drive at the following link; [IGN South Asia 30 Nov. 2022 webinar files](#)

## 9. WEBINAR EVALUATION

The following are the results of the end of webinar poll conducted with participants. 38% participants responded to the poll.

Comments from participants, in their own words;

Tabasum Fida to Everyone 15:10  
 TF Thank you for hosting such type of informative webinar. ...

Muhammad Arslan (GCUF) to Everyone 15:10  
 pleasure to attend this 😊

arnold timmer to Everyone 14:46  
 at Many thanks Faiz and Ireen for the presentations. Good examples and thanks for your leadership

Huraira Maryam to Everyone 15:08  
 HM thanks for give us such a good webinar ,,jazakAllah ...

Muqadas Bilal to Everyone 15:09  
 MB JazakAllah Aloooot For This Informative Webinar 🙏

Ponam to Everyone 15:09  
 P this was very informative ,thanks 😊

Dr Ireen (UNICEF) to Everyone 15:05  
 DI Thank you so much everyone for organizing this webinar

Zivai Murira - UNICEF ROSA to Everyone 15:05  
 ZM Thank you IGN colleagues for the great collaboration! ...

Adeeb Alam Khan to Everyone 15:06  
 AA thank you very much

Hira GCUF to Everyone 15:07  
 HG thanks for such informative webinar

Ali Abbas GCUF to Everyone 15:07  
 AA great to attend it

Kulsuma Bahar Bethi to Everyone 15:07  
 KB Thanks for the Webinar

Izza Faiz GCUF to Everyone 15:03  
 IF Thank you for the informative afternoon! this has left me with hefty things to think about..top notch!

Mubarra Talat to Everyone 15:07  
 MT Thank you for this informative webinar

Aliha Asif GCUF to Everyone 15:07  
 AA Thank you very much for such an informative webinar.

Komal Saleem GCUF to Everyone 15:07  
 thanks for this webinar

Huzaima Khalid (GCUF) to Everyone 15:07  
 HK Thanks for this information webinar

Mahesh Jayasekara to Everyone 15:08  
 Thank you.Gerat to attend the webinar

Mohibullah Wahdati to Everyone 15:08  
 MW this was great, thanks

Rizwan Farooq GCUF to Everyone 15:07  
 RF very informative...thanks

Tabussam Tufail to Everyone 15:07  
 A Great going, thank you

Dr Ireen (UNICEF) to Everyone

DI Thank you so much everyone for organizing this webinar

Bushra Ismail (kfueit ryk) to Everyone

BI Thanks you mam

## **Annex 2 - PROFILE OF PRESENTERS**

### **1. Dr. Werner Schultink, Executive Director, Iodine Global Network**

Dr. Schultink has had broad experience in nutrition, public health, development and humanitarian programme implementation. He was Chief of Nutrition for UNICEF from 2007 to 2016, providing leadership, guidance and strategic direction for UNICEF nutrition programs worldwide. He has also served as Chief of Nutrition and Early Child development for UNICEF India from February 2003-2007.

Most recently, Dr. Schultink has been UNICEF Country Representative in Somalia, and before that he worked as Country Representative in Kenya from 2016-2019, leading the implementation of UNICEF's programs in these countries. As Senior Advisor for Micronutrients at UNICEF from 1999 to 2003, he worked to improve micronutrient nutrition worldwide, including iodine nutrition.

With a scientific background focussed on nutrition, epidemiology and public health, he has provided guidance and leadership on strategic program implementation and capacity building for countries around the world.

He has a doctorate degree in Nutrition from Wageningen University.

### **2. Ms Vilma Tyler Senior Advisor, UNICEF New York**

Vilma Qahoush Tyler is a Senior Nutrition Adviser, at UNICEF Headquarters, leading on the nutrition of school age children, adolescents and women, including the prevention of overweight and obesity and micronutrient deficiencies through Large Scale Food Fortification.

Ms. Tyler has over 30 years of experience in Public Health and Nutrition. Prior to joining the HQ office, she served as the Regional Nutrition Adviser for the UNICEF Middle East and North Africa from 2014-2020, the Chief of Nutrition for UNICEF in South Sudan where she led the emergency nutrition response from 2014 to 2016, and as the Regional Nutrition Adviser for UNICEF Eastern Europe and Central Asia from 2008-2014 while going on surge missions to Syria, Yemen and the State of Palestine.

Prior to joining UNICEF, Ms. Tyler worked as the Program Coordinator for the Food Fortification Initiative at the US Centers for Disease Control and Prevention, in Atlanta, Georgia

Ms. Tyler holds an MPH in International Leadership from Emory University, Atlanta, a Master of Science degree in Human nutrition and an Agriculture Engineering degree from the American University of Beirut, Lebanon.

### 3. **Mr Arnold Timmer, Senior Advisor, Iodine Global Network**

Arnold Timmer, MSc in Nutrition, has 30 years of experience in the field of nutrition and micronutrients, in humanitarian and development contexts.

He contributed to efforts of food fortification, home fortification, the positioning of nutrition in the development agenda, the scaling up of nutrition programs in countries, and in food systems.

He has been working with the Iodine Global Network since 2019 as Senior Adviser and is member of the core team. He is focusing on IGN programmatic support in South Asia, West Africa, Europe and South East Asia and helps advance the global strategic direction for iodine nutrition.

Prior to 2019, he worked with UNICEF for 14 years in Ethiopia, Headquarters and Eastern Europe, as well as with the WHO, CDC US, MSF, Terre des Hommes, UNHCR, and the Global Alliance for Improved Nutrition.

### 4. **Dr Ireen Akhter Chowdhury, Nutrition Officer, UNICEF Bangladesh**

Dr. Chowdhury is a Public Health Specialist, working with UNICEF Bangladesh since 2008. She is a medical graduate and has degree in MPH (Master in Public Health). She is the member of Steering Committees for Food fortification program in Bangladesh.

She has more than 25 years working experiences in diverse nutrition program in Bangladesh. Dr. Chowdhury earned experiences in micronutrient field through providing technical supports to the government for developing and implementing “National strategy for prevention of micronutrient disease in Bangladesh”. She is the pioneer for establishing vitamin A fortification program in Bangladesh in 2010-2013. Since 2015, she is providing technical supports to the government for improving the Iodine nutrition status in Bangladesh. She has significant contribution for changing policy and introducing new Iodized Salt Act 2021 for Universal Salt Iodization Program in Bangladesh.

Currently Dr. Chowdhury is leading the establishment of policy, strategy for national nutrition program for adolescent in line with global experiences and country requirement

### 5. **Mr Faiz Rasool, IGN National Coordinator, Pakistan**

Mr. Faiz is a public health specialist with a hands-on experience in supporting government of Pakistan’s efforts in addressing the challenges of the “Nutrition

Landscape”, food supply chains & the food systems. He has degrees in Public Health and Public Policy with specialization in *Health & Nutrition Communication, Public Policy and Public System Management*. He is PhD Scholar in Human Nutrition & Dietetics. He has vast experience of behaviour change communication for shaping up behaviours towards production and consumption of nutritious foods.

Mr. Faiz Rasool has more than 24 years of diverse experience in “*Development Sector Program Management*”, “*Public Policy Influencing*”, *Public Health* (Reproductive Health & Nutrition), *Food Systems* and *Urban Governance* at regional and National level.

- Mr. Faiz is member of the “Scientific Panel (Nutrition)” at Punjab Food Authority (PFA), Department of Food, Government of the Punjab.
- He has more than 24 years of working experience under Nutrition Landscape and has diversified exposure to public policies & approaches.
- Mr. Faiz is core team member at the National Secretariate on Food Systems (Pakistan Agriculture Research Council (PARC)- Ministry of National Food Security & Research) with a key objective to support the process of “Pakistan Food System Transformation” to achieve the Sustainable Development Goals (SDG’s) by 2030.
- Faiz is also engaged by Ministry of Planning Development & Special Initiatives as an expert for Integration of “Nutrition Advocacy and Awareness in the Pakistan Planning” through building knowledge base of the middle management cadre of public sector officials from government of Pakistan.

Mr. Faiz is Leading the Policy Influencing, Advocacy & External liaising work of the Global Alliance for Improved Nutrition (GAIN) in the country and aligning Global and country strategies of the organization with National policies and priorities and
